

Special Session Biomedical Data Analytics

1 dHealth 2019

Since its beginning in 2007, the dHealth conference series is organized by the Austrian Working Group of Health Informatics and eHealth. Each year, this event attracts around 300 participants from academia, industry, government and health care organizations. In 2019, the conference will take place from 28.-29. May 2019 at Schloss Schönbrunn Tagungszentrum, Vienna, Austria. The Call for Papers is already open and will close on 31. January 2019.

2 Special Session on Biomedical Data Analytics

It is the aim of the ÖGBMT working group „Biomedical Data Analytics“ to connect various research groups in different institutions, working in the field of biomedical data analytics in Austria. Within their Special Session at the dHealth 2019, researchers are invited to submit their valuable work and present their results and discuss them with colleagues from other institutions.

3 Research Topics

The research topics of the Special Session range from pre-processing of single sensor biosignals including feature extraction to data analytics via machine learning approaches, predictive modelling and various methods for visualisation and preparation of “Big Data”.

4 Paper Format and Submission

The paper format for Special Session papers is the same as for regular papers (either full papers or short papers).

Special Session papers are submitted to the dHealth via the regular paper submission and registration system.

Please add an extra initial line in the paper title “Special Session Biomedical Data Analytics:” to indicate that your paper is submitted to the special session.

More details concerning paper format and submission see <http://www.dhealth.at/author-infos/>
